

Bulletin #2007-009a 2 – September - 2007

Subject:

Production Category VINs, updating and backdating

Overview:

Effective immediately, Article 10.2.C.5 is removed in its entirety. Also, Article 10.2.C.3 is replaced with the following:

10.2.C.3. VINs, Model Years, updating and backdating

- a. Production and Production GT vehicles must conform to one of the following:
 - i. An unmolested original VIN on the body shell must match the declared model year for the entry.
 - ii. For vehicles logbooked after 9/1/07, it is permitted to have an "assembled" or "shop made" title and a state assigned VIN, however the shell must also display the vehicle's original unmolested VIN. That VIN must match the declared model year for the entry in order to be P or PGT eligible.
 - iii. Vehicles titled as "assembled" or "shop-made", but not displaying an original VIN, are permitted only if the vehicle was logbooked with a state assigned VIN prior to 9/1/07. A model year for the vehicle must be declared.
- b. The entrant must provide documentation, such as vehicle title or registration, to substantiate a manufacturer's original or state assigned replacement VIN. The declared model year will be noted in the logbook by the Rally America Technical Director only upon his approval of that declared model year.
- c. No updating or backdating of cars, models, and/or components is permitted.

Rationale:

In response to issues that has arisen at recent rallies, clarifications to Production Category backdating and updating rules are needed.

Questions regarding this bulletin received by Rally America from licensed Drivers and Co-Drivers will be answered in writing.
